

VITRECTOMY

IN-PATIENT

RECOMMENDATIONS

Price increase by 10% if more >400 surgeries (B16, B16G, B17, B17G)

But over half of hospitals perform less than 50 vitrectomies a year (2021)

INTERNATIONAL PRACTICE

Only defined hospitals perform surgeries (Hungary).

Initiate strengthening centralisation

DRG types:

- with oil/decaline
- without oil/decaline

"DRG doesn't catch the difference in costs of treatment"
- Clinician

Analyze DRG homogeneity & tariff adjustment

Financing with contracted limits
Income increase only to the limit defined in the hospital budget

1.05.2023 separate financing

INTERNATIONAL PRACTICE

Financing without limits (Slovakia).

Remove financing barriers (limits)

DRUG PROGRAMMES - AMD / DME

AMBULATORY

RECOMMENDATIONS

2-times increase in number of patients treated (2017-2020)

Ensure constant monitoring and evaluation

Separate financing of visits and injections

RESULTS

Flexible approach to patients' health needs

Performed only by providers that meet the entry criteria

"AI could help with early DME detection and enrolment to the program"
- Clinician

Increase in quality

CORNEA TRANSPLANT

IN-PATIENT

RECOMMENDATIONS

Long waiting lists: 3 years

"The longer waiting time the more invasive treatment"
- National Consultant for Ophthalmology

Need for organisational changes in donating cornea

Separate financing for surgery and cornea

RESULTS

Covering all costs of cornea transplant
