Project title: Campus garden behind the SGH Main Building
Applicant(s): Thu Huyen Do
Why is the project important? (no more than 100 words) A campus garden behind the main building (there is a huge free space that is seldom used by students), I have seen this being done on campus in Sweden. This will promote healthy living, as well as maybe create a community around it. Students nowadays do very few things outside of sitting in the office and at university.
Project description (no more than 250 words) We could in the summer months use the garden for growing salads, radishes, mint, basil, things students can snack on or put into water during school hours to promote a healthier lifestyle.
Simplified cost estimate We need to create wooden boxes for the produce and it should cost maybe 100 zł per a smaller box, maybe up to 500 zł per a huge box. We need to buy good quality soil, some seeds. The whole endeavor can have a budget of 5 000 zł. But this would be a very easy project to promote donations from sponsors.
