Project title: Focused learning zone at the SGH
Applicant(s): Aleksandra Śliwińska
Why is the project important? (no more than 100 words) Students spend a significant portion of their time at the university. In the flurry of responsibilities and distractions, they find it increasingly difficult to focus their attention. Therefore, it is necessary to create an isolated space that would not only facilitate effective learning, but also be used for project and team building meetings. Such a space would for example allow better focus, serve people with impaired concentration and people with disabilities. A quiet zone is an investment in the comfort and efficiency of learning, and a step toward building a more inclusive school.
Project description (no more than 250 words) The project involves the purchase and installation of a modern soundproof booth. The booth will be available to all students and employees who need to spend a quiet time during the day. The booth will be placed in an easily accessible location on campus, such as the library or the main G building, and it will be possible to install a green partition wall in the future. The booth will be equipped with comfortable seating, a desk, lighting, ventilation and electrical outlets.
Simplified cost estimate 33 000 – cost of the booth 2 000 – installation and transportation
