

Name and surname, academic title / academic degree	Affiliation: collegium, institute / department	e-mail address in the SGH domain	The scientific discipline	Brief description of the research carried out so far	Proposed topics of doctoral dissertations within the indicated scientific discipline
<b>Economics and Finance</b>					
Jakubczyk Michał, PhD (habil.), Associate professor	Collegium of Economic Analysis, Decision Analysis and Support Unit, Institute of Econometrics,	<a href="mailto:michal.jakubczyk@sgh.waw.pl">michal.jakubczyk@sgh.waw.pl</a>	Economics and Finance	I conduct research mostly in decision theory (typically applied to the healthcare context of health technology assessment) and particularly in health preference research. Please see <a href="https://web.sgh.waw.pl/~mjakubc/index.php?id=1&amp;lang=0">https://web.sgh.waw.pl/~mjakubc/index.php?id=1&amp;lang=0</a> for publications.	Economic aspects of health technology assessment and to studying societal preferences for health (including methodological studies aimed at understanding the properties of preference-elicitation methods, e.g. time trade-off, standard gamble, discrete choice experiments, or others).
Wandel Jürgen Dr hab., prof. SGH	Collegium of World Economy/ World Economy Research Institute	<a href="mailto:jwande@sgh.waw.pl">jwande@sgh.waw.pl</a>	Economics and Finance	The research is directed towards understanding the impact of economic and political institutions on economic development as well as the political and societal processes shaping economic policy decisions. A geographical focus is on Germany, German-Polish relations within the European Union, Central and Eastern Europe and emerging markets. Further research interests include economic systems, varieties of capitalism, competition theory and policy, Institutional Economics, Public Choice and the History of Economic	Topics related to the German economy and economic policy (e.g. industrial policy; energy transition, agri-food transformation, future of the social market economy), developments in the EU (e.g. Green Deal, trade relations), German-Polish economic relations, economic development in transition and developing countries, competition issues in various industries (e.g. in big tech) as well as topics drawing on institutional economics, public choice theory and related approaches.

				Thought, i.e. Austrian Economics.	
Wiśniewski Piotr, PhD, Habilitation	College of Management & Finance, Institute of Risk and Financial Markets	<a href="mailto:pwisni2@sgh.waw.pl">pwisni2@sgh.waw.pl</a>	Economics and Finance	<p>My research focuses on three distinct areas:</p> <p>1) asset management and collective investment schemes/pooled investment vehicles (pension-, mutual-, insurance-, sovereign wealth-, private equity- and exchange traded funds) – their efficiency, competitiveness and structural factors;</p> <p>2) social media economics – capital formation, performance metrics, value extraction and pricing;</p> <p>3) intellectual capital – intangible drivers of corporate finance, including industrywide and macroeconomic metrics</p>	Advanced investment banking topics (the investment banking “frontier”, evolution, systemic factors, case studies); asset management (e.g. mutual funds, hedge funds, private equity/venture capital funds; sovereign wealth funds and exchange traded funds); competitiveness of global financial centers (including the international position of the Warsaw Stock Exchange); the mechanics of initial and secondary public offerings; advanced comparative accounting (e.g. U.S. GAAP vs IFRS); “creative and aggressive accounting” (quantitative and ethical aspects; bearing on corporate governance); global financial derivatives markets (public and O.T.C.); intellectual capital/intangible corporate drivers (also in financials); international taxation (systemic features, competitiveness of offshore financial centers); financial centers’ oversight (including regulatory arbitrage).
Growiec Jakub, Professor	Collegium of Economic Analysis, Department of Quantitative Economics	<a href="mailto:Jakub.growiec@sgh.waw.pl">Jakub.growiec@sgh.waw.pl</a> www: <a href="http://web.sgh.waw.pl">http://web.sgh.waw.pl</a>	Economics and Finance	Jakub Growiec (PhD 2007) specializes in the economics of long-run growth and technological progress. He also studies production functions, both from a theoretical and	Long-run economic growth Technological change Automation, digitalization, AI adoption Productivity, convergence, international technology diffusion

		<a href="http://h.waw.pl/~jg23234/">h.waw.pl/~jg23234/</a>		empirical angle, and the macroeconomics of human and social capital.	Production functions, factors of production, factor shares Macroeconomic dynamics Global inequality
Kawiński Marcin Ph.D., Associate professor	Department of social Insurance, Collegium of Socio-Economics	<a href="mailto:mkawin@sg.h.waw.pl">mkawin@sg.h.waw.pl</a>	Economics and Finance	His scientific interest focuses on management of social risk with insurance from the perspective of households, insurance market participants, but also regulators and supervisor. The on-going projects cover personal finance from an insurance perspective and performance of insurance from the users perspective; pension scheme and the usage of behavioural mechanisms; ESG in finance. The past projects included social risk management, risk awareness, guarantee schemes in basic pension schemes, best benchmarks for pension funds and their presentation to the funds' members, and equity release.	Insurance, pension, ESG
Kolasa Marcin prof. dr hab.	Collegium of Economic Analysis, Department of Quantitative Economics	<a href="mailto:mkolas@sgh.waw.pl">mkolas@sgh.waw.pl</a>	Economics and Finance	Developing and applying theoretical macroeconomic models in the field of monetary economics, international economics and financial intermediation, in particular to study the consequences of monetary integration, transmission of macroeconomic	theoretical and empirical modeling of macroeconomic processes

				shocks, impact of financial frictions on business cycle and welfare, redistributive effects of policies, impact of demographics and pandemics on economic policy	
Prokop Jacek, dr habil, Professor SGH	Collegium of World Economy/Department of Business Economics	<a href="mailto:jacek.prokop@sgh.waw.pl">jacek.prokop@sgh.waw.pl</a>	Economics and Finance	Free-Riding Problems in corporate takeovers, International Debt Problems, Cartel formation, monopolization and cartelization of industries; for more information on my research activities see: <a href="http://web.sgh.waw.pl/~jproko/">http://web.sgh.waw.pl/~jproko/</a>	Free-Riding Problems, International Debt Problems, Cartel formation, monopolization and cartelization of industries.
Rubaszek Michał, Dr hab. prof. SGH	Econometrics Institute, Financial Markets Modelling Unit	<a href="mailto:mrubas@sgh.waw.pl">mrubas@sgh.waw.pl</a>	Economics and Finance	His research interests cover macroeconomic forecasting and simulations; financial markets (in particular exchange rates) modelling; housing market analyses and energy transition. More details available at <a href="http://web.sgh.waw.pl/~mrubas">web.sgh.waw.pl/~mrubas</a>	Forecasting, Asset Pricing, Risk Modelling, Energy Transition
Kowalski Arkadiusz dr hab., prof. SGH	Collegium of World Economy, Deputy Director of World Economy Research Institute, Head of the Department of	<a href="mailto:arkadiusz.kowalski@sgh.waw.pl">arkadiusz.kowalski@sgh.waw.pl</a>	Economics and Finance	Clusters versus cluster initiatives, with focus on ICT sector; Innovation policy and performance of Polish enterprises: in search for cluster cooperation additionality; International Competitiveness in the Context of Digital Economy and Industry 4.0; Promotion of Technology Commercialization: Policies Supporting Start-ups;	clusters, start-ups, innovation, science-business interactions, transfer of technology, Industry 4.0, international competitiveness, internationalization of firms (international trade, foreign direct investment (FDI)), Asian economies

	East Asian Economic Studies			Challenges and Instruments of Innovation Policy in Poland in the Context of Industry 4.0; Smart Specialization through Cluster Policy; Innovation Divide in the World Economy: China's Convergence Towards the Triad; Healthcare Systems and Pharmaceutical Industry in Emerging and Developed Economies. China and Poland versus the US and the EU	
Staszkievicz, Piotr PhD, prof. SGH	Collegium of Business Administration, Institute of Corporate and Investment Finance	<a href="mailto:pstasz@sgh.waw.pl">pstasz@sgh.waw.pl</a>	Economics and Finance	Research in the field of auditing and integrated reporting. Current research is on the communication (sentiment) of financial reporting [1], [2], the application of artificial intelligence, the impact of digitalization (XBRL) in a sustainable environment and meta-analysis and synthesis of research [3].	a. Use of artificial intelligence in risk assessment of assurance engagements – Management. b. Limitations of meta-analysis, citation count regression and narrative review for aggregation of research findings - Economics and finance
Kuźnar Andżelika, dr hab.	Collegium of World Economy, Institute of International Economics	<a href="mailto:andzelika.kuźnar@sgh.waw.pl">andzelika.kuźnar@sgh.waw.pl</a>	Economics and Finance	Andżelika Kuźnar conducts research in international economics, particularly on international trade, trade policy, economic integration, and foreign direct investments. An important area of her research is international trade in services.	Research relating to i.e. international trade in goods and services, international trade policy, regional trade agreements, international flows of capital.
Tymicki Krzysztof, dr hab.	Collegium of Economic Analysis,	<a href="mailto:krzysztof.tymicki@sgh.waw.pl">krzysztof.tymicki@sgh.waw.pl</a>	Economics and Finance	Research interest focuses on multidimensional analysis of demographic problems such as	Demographic analyses of contemporary and historical societies with respect to: family formation process, fertility,

	Institute of Statistics and Demography		(Economics – demography)	changes in fertility patterns, family formation, union dissolution, mortality, changes in population structure and its effect on society and economics. Application of quantitative methods in demography. Additional research interest focuses on application of statistical methods for analysis of survey data in context of marketing and social research with special reference to individual attitudes and preferences	mortality, interactions of demographic factors with labor market Application of economic and sociological theories for explanation of various social phenomena such as: individual wellbeing, attitudes and preferences Application of statistical methods for analysis of survey data in the context of marketing research
Pruchnicka-Grabias Izabela, Dr hab., PhD	Collegium of Socio-Economics, Institute of Banking	<a href="mailto:ipruch@sgh.waw.pl">ipruch@sgh.waw.pl</a>	Economics and Finance (finance)	Expert in finance. Her research focuses on different aspects of financial markets, financial instruments, finance and banking, relations between different macroeconomic factors and their influence on financial markets, influence of ratings on companies and financial markets.	Investment funds, Banking, Alternative investments (f. ex. cryptocurrencies, precious metals, hedge funds, private equity), Financial stability and its determinants, Financial instruments including derivatives and their applications for risk management in a company, Statistics and econometric modeling in finance and economics, Economic development of countries, Investment portfolio management in a financial institution (f.ex. in an investment fund), Financial markets, the influence of special events on financial markets and economy, the influence of ratings on the valuation of stocks and bonds, relations between financial sector and real economy.

Raulinajtys-Grzybek Monika dr hab., prof. SGH	Department of Management Accounting / Collegium of Business Administration	<a href="mailto:mrauli@sgh.waw.pl">mrauli@sgh.waw.pl</a>	Economics and Finance (finance)	<ul style="list-style-type: none"> <li>• management accounting and cost accounting,</li> <li>• business reporting,</li> <li>• accounting for sustainable development,</li> <li>• health care finances</li> </ul>	I will be pleased to lead a PhD student writing a thesis in the area of management accounting, cost accounting, financial and non-financial reporting as well as health care finance issues - both from the macro and micro perspective.
Malgorzata Pawlowska, Ph.D.	Institute of Risk and Financial Markets/ Collegium of Management and Finance/Traditional Banking Unit	<a href="mailto:mpawlo1@sgh.waw.pl">mpawlo1@sgh.waw.pl</a>	Economics and Finance (finance)	Banking sector, financial sector, new digital technology in the financial sector, lending market, relationship between finance and economy and macro-financial linkage, lending market, efficiency and competition of the banking sector, bank-firm relationships and credit rationing.	Banking and Finance, New technology in financial sector, Macrofinancial linkage, Financial Economics.
Polański Zbigniew Profesor dr hab. (full professor)	College of Management and Finance. Institute of Political Economy, Law and Economic Policy. Department of Economic Policy and Monetary Theory	<a href="mailto:zpolansk@sgh.waw.pl">zpolansk@sgh.waw.pl</a>	Economics and Finance (finance)	Finance and economy. Money and Banking; Monetary Theory and Policy. My research is focused on financial system developments with particular emphasis on money, money markets, monetary policy and central banking, including exchange rate and financial crises issues. I try to adopt an international perspective, although typically concentrated on European topics. I favour an institutional and evolutionary approach to economic analysis.	Suggested issues for Ph.D. students' research: Evolution of forms of money and monetary policy frameworks; Money and monetary innovations. Private vs public digital currencies (Central Bank Digital Currencies, CBDC); Central banks, seigniorage and their financial results; Central bank independence, communication and transparency; Topics in monetary theory: demand for money, money supply creation process, interest rates and exchange rates; Inflation/deflation and their effects; Monetary policy goals and strategies; The monetary transmission mechanism; Conventional

					and unconventional monetary policy instruments; Financial system issues in transition economies and the European Union; European Union enlargement and Euro Area accession problems; The impact of globalization on central bank policies; Monetary policy in Poland and the Euro Area challenge; Euro Area problems and the future of monetary unions.
Karwowski. Mariusz, dr hab. prof. SGH	Collegium of Business Administration , Department of Management Accounting	<a href="mailto:mkarwo@sgh.waw.pl">mkarwo@sgh.waw.pl</a>	Economics and finance (finance)	In research Prof. Mariusz Karwowski deals with the issues of: non-financial reporting (CSR and integrated), financial and management accounting, auditing, taxes. These issues are interdisciplinary and located within finance, economics, and management sciences.	
Szypulewska-Porczyńska, Alina PhD, Professor SGH	Collegium of World Economy, Institute of International Economic Policy, International Financial Policy Unit	<a href="mailto:aszypu@sgh.waw.pl">aszypu@sgh.waw.pl</a>	Economics and Finance	Research in the field of economics and international politics. Currently, the research focus is on sustainability. And so, the latest studies include, inter alia, issues of public goods, sustainable consumption, sustainable finance, and paradigm shift in innovation policy.	Proposed examples of dissertation fields include responsible finance, the EU innovation policy, the international cooperation system, EU internal market and policies, and economic and monetary union.
Horodecka Anna, PhD, Professor SGH	Collegium of World Economics, Institute of	<a href="mailto:ahorod@sgh.waw.pl">ahorod@sgh.waw.pl</a>	Economics and Finance;	A brief description of the research to date: Economic Policy	Sustainable development & sustainable consumption and policies: SDGs, Ecological Transition
